

**Petition to Withdraw the Proposed Location of Highway #1 East Bypass
Through the City of Regina**

We, the undersigned residents of the Province of Saskatchewan, wish to bring to your attention the following:

That insufficient weight has been given to concerns raised in regards to the location of the East Regina / Highway 1 Bypass and Pilot Butte interchange that will impact taxpayers and everyone using it.

That there are serious concerns about safety of the proposed East Regina/Highway #1 Bypass which is within City limits and too close to residential developments.

That the Tower Road location and proposed Pilot Butte interchange risks functionality, are at excessive costs, and are not a suitable long term solution.

The prayer that reads as follows, respectfully request that the Legislative Assembly of Saskatchewan cause a halt to the next phase of this project and cause the Ministry of Highways and Infrastructure to review the proposed location of #1 Bypass at Tower Road, and select a suitable location further east, one that will bypass City developments and create a safer environment for the motorists using it and for the taxpayers of this province.

That there are serious concerns about safety of the proposed East Regina/Highway #1 Bypass which is within City limits and too close to residential developments.

That the Tower Road location and proposed Pilot Butte interchange risks functionality, are at excessive costs, and are not a suitable long term solution.

The prayer that reads as follows, respectfully request that the Legislative Assembly of Saskatchewan cause a halt to the next phase of this project and cause the Ministry of Highways and Infrastructure to review the proposed location of #1 Bypass at Tower Road, and select a suitable location further east, one that will bypass City developments and create a safer environment for the motorists using it and for the taxpayers of this province.

**Petition to Withdraw the Proposed Location of Highway #1 East Bypass
Through the City of Regina**

We, the undersigned residents of the Province of Saskatchewan, wish to bring to your attention the following:

That insufficient weight has been given to concerns raised in regards to the location of the East Regina / Highway 1 Bypass and Pilot Butte interchange that will impact taxpayers and everyone using it.

That there are serious concerns about safety of the proposed East Regina/Highway #1 Bypass which is within City limits and too close to residential developments.

That the Tower Road location and proposed Pilot Butte interchange risks functionality, are at excessive costs, and are not a suitable long term solution.

The prayer that reads as follows, respectfully request that the Legislative Assembly of Saskatchewan cause a halt to the next phase of this project and cause the Ministry of Highways and Infrastructure to review the proposed location of #1 Bypass at Tower Road, and select a suitable location further east, one that will bypass City developments and create a safer environment for the motorists using it and for the taxpayers of this province.

**Petition to Withdraw the Proposed Location of Highway #1 East Bypass
Through the City of Regina**

We, the undersigned residents of the Province of Saskatchewan, wish to bring to your attention the following:

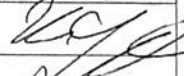

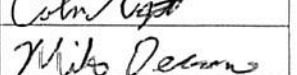

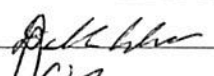

That insufficient weight has been given to concerns raised in regards to the location of the East Regina / Highway 1 Bypass and Pilot Butte interchange that will impact taxpayers and everyone using it.

That there are serious concerns about safety of the proposed East Regina/Highway #1 Bypass which is within City limits and too close to residential developments.

That the Tower Road location and proposed Pilot Butte interchange risks functionality, are at excessive costs, and are not a suitable long term solution.

The prayer that reads as follows, respectfully request that the Legislative Assembly of Saskatchewan cause a halt to the next phase of this project and cause the Ministry of Highways and Infrastructure to review the proposed location of #1 Bypass at Tower Road, and select a suitable location further east, one that will bypass City developments and create a safer environment for the motorists using it and for the taxpayers of this province.

Date: April 2 / 2015

Room 265 Legislative Building, Regina, SK S4S 0B3 (Phone: 787-7388)**

**Petition to Withdraw the Proposed Location of Highway #1 East Bypass
Through the City of Regina**

We, the undersigned residents of the Province of Saskatchewan, wish to bring to your attention the following:

That insufficient weight has been given to concerns raised in regards to the location of the East Regina / Highway 1 Bypass and Pilot Butte interchange that will impact taxpayers and everyone using it.

That there are serious concerns about safety of the proposed East Regina/Highway #1 Bypass which is within City limits and too close to residential developments.

That the Tower Road location and proposed Pilot Butte interchange risks functionality, are at excessive costs, and are not a suitable long term solution.

The prayer that reads as follows, respectfully request that the Legislative Assembly of Saskatchewan cause a halt to the next phase of this project and cause the Ministry of Highways and Infrastructure to review the proposed location of #1 Bypass at Tower Road, and select a suitable location further east, one that will bypass City developments and create a safer environment for the motorists using it and for the taxpayers of this province.

Petition to Withdraw the Proposed Location of Highway #1 East Bypass Around the City of Regina

We, the undersigned residents of the Province of Saskatchewan, wish to bring to your attention the following:

That insufficient weight has been given to concerns already raised in regards to the location of the East Regina / Highway 1 Bypass and Pilot Butte interchange, that will impact taxpayers and everyone using it.

That the proposed East Regina/Highway #1 Bypass is too close to the City of Regina, is within City limits, and residential developments are already up to Tower Road.

That the Tower Road location and proposed Pilot Butte interchange are not a suitable long term solution to solve a long term problem. There are serious concerns about the safety and costs of these bypass locations.

We, in the prayer that reads as follows, respectfully request that the Legislative Assembly of Saskatchewan cause a halt to the next phase of this project and cause the Ministry of Highways to withdraw the proposed location of #1 Bypass at Tower Road, and select a suitable location further east, one that will bypass City developments and function as a true bypass.

**Petition to Withdraw the Proposed Location of Highway #1 East Bypass
Through the City of Regina**

We, the undersigned residents of the Province of Saskatchewan, wish to bring to your attention the following:

That insufficient weight has been given to concerns raised in regards to the location of the East Regina / Highway 1 Bypass and Pilot Butte interchange that will impact taxpayers and everyone using it.

That there are serious concerns about safety of the proposed East Regina/Highway #1 Bypass which is within City limits and too close to residential developments.

That the Tower Road location and proposed Pilot Butte interchange risks functionality, are at excessive costs, and are not a suitable long term solution.

The prayer that reads as follows, respectfully request that the Legislative Assembly of Saskatchewan cause a halt to the next phase of this project and cause the Ministry of Highways and Infrastructure to review the proposed location of #1 Bypass at Tower Road, and select a suitable location further east, one that will bypass City developments and create a safer environment for the motorists using it and for the taxpayers of this province.

Date: Dec 6/2014
